Indxx 5G & NextG Thematic Index Licensed by First Trust for Exchange Traded Fund

Indxx is pleased to announce the [Indxx 5G & NextG Thematic Index](#) (the “Index”) has been licensed to US-based ETF provider [First Trust Advisors](#) as the underlying benchmark for the First Trust Indxx NextG ETF (NASDAQ: NXTG), which began trading today.

The Index (ticker: INXTG) is designed to track the performance of companies that are at the core of the research and development of the new 5G cellular technology and next generation technologies as they emerge. The Index seeks to include only companies that have devoted material resources or made material commitments to the use of 5G technology. 5G is the next (fifth) generation of cellular technology, which promises to greatly enhance the speed, coverage and responsiveness of wireless networks.

“Indxx is excited to have developed one of the world’s first indices to provide exposure to the 5G space” said Rahul Sen Sharma, Managing Partner at Indxx. “Many experts believe that 5G has the potential to be a revolutionary development across sectors and industries on a global scale. Our index research and development team is proud to have built an index that effectively targets it via a disciplined and transparent, rules-based approach.”

According to Ryan Issakainen, CFA, ETF Strategist and Senior Vice President at First Trust: “In our view, 5G cellular technology is an important innovation with the potential to reshape the way that wireless networks are utilized. We believe this ETF provides exposure to many of the companies that will lead the way as 5G networks are introduced across the globe.”

About Indxx

Founded in 2005, Indxx endeavors to deliver innovative and custom indexing and calculation solutions to the investment management community at large.

Indxx and products tracking our indices have been nominated for and received numerous awards, including most recently ‘Most Innovative ETF Index Provider’ for the Americas at the 14th Annual Global ETF Awards in July 2018.
