

Press Release

Indxx Licenses Indxx Global Robotics & Artificial Intelligence Thematic Index for Korean ETF

New York – August 17, 2023 - [Indxx](#) is pleased to announce the licensing of their [Indxx Global Robotics & Artificial Intelligence Thematic Index](#) to Mirae Asset Global Investments as the underlying benchmark for the TIGER Global AI & Robotics Indxx ETF (Ticker:464310) which began trading today on the Korea Exchange (KRX).

The Indxx Global Robotics & Artificial Intelligence Thematic Index is designed to track the performance of companies listed in developed markets that are expected to benefit from the increased adoption and utilization of Robotics and Artificial Intelligence (“AI”), including companies involved in Industrial Robotics and Automation, Non-Industrial Robots, Artificial Intelligence and Unmanned Vehicles.

“Artificial intelligence is poised to define this decade. We are seeing tremendous adoption of Robotics and AI exposure. The Global Robotics & Artificial Intelligence Thematic Index is one of our most popular indices, with Mirae Asset Global Investments launching the sixth ETF tracking this index.” said Rahul Sen Sharma, CEO at Indxx. “We are excited to partner with Mirae Asset Global Investments, who recognize the value in providing investors with well-rounded exposure as this technology comes into its own.”

Chandan Kumar GV, Head of Index Products at Indxx added, “At Indxx, each index represents a unique methodology backed by extensive research. By partnering with Mirae Asset Global Investments, we are thrilled to allow a new cohort of investors to increase their exposure to companies paving the way in Robotics & AI.”

Minkyoo Song, Senior Manager at Mirae Asset Global Investments, commented on the launch: “With our launch of the new ‘TIGER Global AI & Robotics Indxx ETF (464310)’ we are excited to offer a way to invest in the rapidly-growing AI & Robotics industry. Generative AI has been receiving continuous attention since last year, and we think the robotics industry can create a powerful synergy with the growth of AI. Existing industrial robots were mostly focused on executing relatively simple tasks, but the advancement of AI technology allows robots to make judgments, making the scope of utilization much broader. In addition, due to the aging population and rising wages caused by inflation, major countries are very keen on promoting both the AI and robotics industries.”

As of August 17, 2023, the Indxx Global Robotics & Artificial Intelligence Thematic Index has 42 constituents. The index has been back-tested to June 30, 2010, and has a live calculation date of August 29, 2016. Additional information on the Indxx Global Robotics & Artificial Intelligence Thematic Index can be found [here](#).
