Indxx Licenses SuperDividend® U.S. Low Volatility Index to Global X Japan for an Exchange Traded Fund

New York – July 14, 2023 - [Indxx](#) is pleased to announce the licensing of their [Indxx SuperDividend® U.S. Low Volatility Index](#) to Global X Japan as the underlying benchmark for the Global X SuperDividend® U.S. ETF (Ticker: 2253) which began trading on the Tokyo Stock Exchange on July 11. This marks the second fund tracking the index, with the first being a US listed ETF.

The Indxx SuperDividend® U.S. Low Volatility Index is a maximum 50-stock equal weighted index designed to measure the market performance of companies in the United States that have a high dividend yield and low beta.

“According to an analysis by Fidelity, dividends have constituted 40% of stock market returns since 1930, and 54% during decades with high inflation. Amidst uncertainties such as potential market downturns and a rise in inflation, dividend are an excellent opportunity for both growth and stability,” said Rahul Sen Sharma, President & Co-CEO at Indxx. “Our Index provides exposure to high dividend yield stocks with low volatility. The DIV ETF, which is listed in the United States and tracks this index, has achieved significant success since its inception. Currently, the product has over \$600 million in assets under management. We are delighted to partner with Global X Japan to bring this successful strategy to the Japanese market.”

Chandan Kumar GV, Head of Product Development and APAC Sales at Indxx added, “Our Indxx SuperDividend® U.S. Low Volatility Index utilizes a unique methodology to identify high dividend yield stocks in the United States, focusing on both high yield and dividend consistency. This strategic approach ensures targeted exposure to low volatility stocks with attractive yields. With a yield of over 9% in the past year (As of July 14, 2023), the index has demonstrated its ability to achieve its objectives. We are excited to join forces with Global X ETFs Japan, providing Japanese investors with an opportunity to benefit from this innovative investment strategy.”

As of July 14, 2023, the Indxx SuperDividend® U.S. Low Volatility Index has 50 constituents. It has a backtested date of February 29, 2008 and a live calculation date of March 18, 2013. Additional information on the Indxx SuperDividend® U.S. Low Volatility Index can be found [here](#).
