

Press Release

Indxx Launches New Corporate Actions Platform, CAdmin

New York – August 01, 2022 - [Indxx](#), a provider of innovative and custom indexing solutions, is pleased to announce the launch of their latest platform, CAdmin. It is a centralized, integrated hub of all ordinary & extraordinary corporate actions that helps optimize automation and minimize calculation errors. Developed through close liaison with its current customers, CAdmin is designed to offer various customization options.

As a result of extensive analysis, CAdmin can support high volumes of corporate actions and complex multi-x capabilities with validation and governance within a single platform. A benefit of the platform is reducing the fixed costs associated with corporate actions validation to a variable cost as per client's requirements. With the development of this platform, Indxx hopes to transfer the burden of corporate actions from clients to a trusted professional service provider.

Corporate action processing is one of the 'last frontiers of pain' for investment management and is one of the most manual and complex components of back-office operations. Over 4 million corporate actions are processed per year and 50% of those are processed manually, thereby placing a heavy reliance on human intervention. The lack of uniformity and standards makes it difficult to identify and interpret information correctly and highlights the need to obtain precise and timely information, where otherwise errors can result in painful financial losses.

CAdmin takes into account compliance and data privacy of its customers. All data handled by the platform on a daily basis is provided by the client and is stored solely on the client's servers. Clients will also have access to a customized dashboard and analytics based on their planning and decision-making needs. It also includes a feature that enables companies to build their customized universe of securities to track daily corporate actions.

Commenting on the launch of CAdmin, Managing Partner of Indxx, Rahul Sen Sharma said, "At Indxx, we are committed to providing innovative solutions to our clients. With over 15 years of experience in the indexing industry, we identified a need for a more effective corporate action management solution and established our Indxx Data & Technology service to address such industry challenges. I'm extremely proud to announce the launch of our debut technology product, CAdmin. This would not have been possible without the dedication of our incredible team. Congratulations to the entire team on achieving this milestone. We look forward to developing more such products and continuing to add value to the investment management community."

CAdmin provides an extensive global coverage and is available for licensing across the world.

About Indxx
