

## Press Release

### Indxx Technology REITs Index Licensed to Meitav Tachlit Mutual Funds Ltd. for an Index Tracking Fund

**New York – November 06 , 2020** - [Indxx](#) is pleased to announce that the [Indxx Technology REITs Index](#) (the “Index”), has been licensed to Israel-based Meitav Tachlit Mutual Funds as the underlying benchmark for an index tracking fund (Tel Aviv: 5131933), which began trading on the Tel Aviv Stock Exchange last week.

The Index (Ticker: IDTREIT), tracks the performance of REITs, listed in United States, Canada or Developed Europe, that are positioned to benefit from the spread of technology.

“Real Estate has limited correlation to other asset classes and is often looked upon by investors as part of an ideal asset mix. In addition, REITs provide additional income benefits and also have the potential for long term capital appreciation,” said Rahul Sen Sharma, Managing Partner at Indxx. “Our Indxx Technology REITs Index aims to provide exposure to REITs operating and managing properties that support some of the fastest growing technology sectors such as Cell Towers REITs, Data Centre REITs, and Industrial REITs. With advancements such as 5G and growth in the e-commerce industry, the Technology REITs industry is expected to experience rapid growth in the short and long term. We are very excited to bring this innovative product to the market with Tachlit.”

As of November 06, 2020, the index has 31 constituents. It has a backtested date of March 31, 2015 and a live calculation date of April 22, 2020. Additional information can be found [here](#).
